

## Keywords index

<b>A</b> bductive network	92	<b>M</b> achining	84
Adiabatic shear banding	77	Manufacturing and processing of engineering materials	77-100
<b>C</b> ast aluminium alloy	100	Mechanical properties	84
Casting	69	Methods of analysis and modelling	106-120
Chip morphology	77	<b>O</b> ptimal design	92
Composites	69, 92	<b>P</b> lane stress	112
Computer simulations	69, 120	<b>Q</b> uenching	120
Cutting forces	77	<b>R</b> ubber composites	112
Cutting speed	77	<b>S</b> A method	92
<b>D</b> amage mechanism	112	Simulation	106
Deep drawing	106	Solidification	69
Depth of cutting	84	Static sollicitation	112
Ductile fracture locus	100	Stress triaxiality	100
Ductility	100	<b>T</b> earing energy	112
Dynamic properties	84	Titanium alloy	77
<b>E</b> ngineering materials	69		
Experimental design	92		
<b>F</b> inite Element Analysis	106, 112		
<b>H</b> igh-hardenability steels	120
