

CONTENTS:

ENGINEERING MATERIALS

- Characterisation of syndiotactic polystyrene/carbon nanofiber composites through X-ray diffraction using adaptive neuro-fuzzy interference system and artificial neural network** 197
S. Bose, D. Shome, C.K. Das (India)

ENGINEERING MATERIALS PROPERTIES

- Examination and simulation of composite materials Al-Al₂O₃ tribological properties** 205
L.A. Dobrzański, M. Kremzer, J. Trzaska (Poland), A. Nagel (Germany)

METHODS OF ANALYSIS AND MODELLING

- Determination of wetting at elevated temperatures using image analysis** 213
D. Kocaeffe, G. Ergin, V. Villeneuve, Y. Kocaeffe (Canada)
- Modelling and computer simulation of reagents diffusion in high temperature diffusion controlled heterogeneous reactions** 225
M. Radune, A. Radune, F. Assous, M. Zinigrad (Israel)
- Particle swarm optimisation of hardness in nickel diamond electro composites** 232
K. Ramanathan, V.M. Periasamy, Malathy Pushpavanam, U. Natarajan, (India)
- Interaction model for predicting bead geometry for Lab Joint in GMA welding process** 237
D.T. Thao, I.S. Kim (South Korea)
- Theoretical analysis of plastic zone of a circle crack under gigacycle fatigue regime** 245
T. Wu, T. Mo, W. Chen (China), E. Bayraktar (France)

Indexes

- Author index** 252
- Keywords index** 252
- Index of Authors publishing in Archives of Computational Materials Science and Surface Engineering in 2009 (Vol.1/1-4) 2009** 253
